The Correlates of Religion and State Jonathan Fox 2020-06-30 This comprehensive volume examines the nature, causes, and consequences of state religion policy in 183 countries between 1990 and 2014. Each contribution uses round 3 of the Religion and State dataset which includes information on 117 distinct state religion policies. Secular and religious forces in society and government compete in order to influence state religion policy in a vibrant religious economy. While governments are more involved in religion in 2014 than they were in 1990, most states both added and dropped religion policies during this period. This is important because these policies impact on a number of important political, social, and economic phenomena. In this collection the authors examine the impact of state religion policies on interstate militarized disputes, violent domestic conflict, terrorism, and voting for political parties. They also examine some of the factors that influence state religion policy, including the attitudes of citizens toward religion and religious minorities, free and open elections, and having an independent judiciary. This book was originally published as a special issue of the journal Religion, State & Society.

Marine Diesel Engines Nigel Calder 2003 Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, Nada, a project they completed in 1984. Calder is author of numerous articles for Yachting Monthly and many other magazines worldwide, as well as the bestselling Boatowner's Practical and Technical Cruising Manual and Boatowner's Mechanical and Electrical Manual, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'
