to application of a considered approach to study station-ary regime of a persistent current qubit, explored by authors of Ref. [34]. The analysis of the persistent current qubit dynamics was implemented in Sec. IV. In Sec. V we adopt the rate-equation formalism for describing a multi-level system, proposed in Ref. [7]. It is noticeable

Missing-data imputation - Department of Statistics

A direct approach to missing data is to exclude them. In the regression context, this usually means complete-case analysis: excluding all units for which the outcome or any of the inputs are missing. In R, this is done automatically for classical regressions (data points with any missingness in the predictors or outcome are ignored by the ...
