Post-COVID Economic Revival, Volume I Vladimir S. Osipov 2021 This two-volume book examines the most important global problem--the recovery of the social-economic crises due to the COVID-19 pandemic. This economic crisis has its own basis and differs from others by the lockdown of most businesses on the decision of authorities. The uncertainty of the future economic revival obliges scientists around the world to unite in search of effective solutions that will become the basis for prosperity and human wellbeing. The death of millions of people around the world, several waves of coronavirus, and a global pandemic have forced most states to seek extraordinary measures to save people and revive

economic activity. The world economy experienced a global shock, probably never experienced before due to lockdowns. The disruptions and gaps in the value chains were primarily caused by the lockdowns of enterprises. The change in the essence of the economic crisis has raised the question of how to overcome it and revive economic activity. The crisis caused a sharp decline in incomes of the population around the world, which led to social upheavals. Post-COVID economic revival in a globalized world has become the most important problem of our time. This book offers contributions of authors from different countries and explores problem solving in the fields of public administration (Volume I, Part I), financial services (Volume I, Part II), different branches (Volume II, Part III) and the social sector (Volume II, Part IV). The first volume discusses governmentality, public, and corporate management. The second part of the volume reveals the trends in the development of the financial sector in the post-COVID period. Despite the fact that the book is divided into two volumes and four parts, a holistic and systematic perception of the new reality of the post-COVID age can be obtained by reading the entire book. This book will be of interest to academics and practitioners in public administration and economics, particularly those who are interested in Post-COVID economic revival. Vladimir S. Osipov is a doctor in Economics and Professor in the Asset Management Department at MGIMO University, Moscow, Russia. Thibodeau 2017-02-03 As auditors, we are trained to investigate beyond appearances to determine the underlying facts—in other words, to look beneath the surface. With the availability of greater levels of qualitative and quantitative information (“big data”), the need for technical skills and challenges facing today’s auditor is greater than ever. The author team of Louwers, Blay, Sinason, Strawser, and Thibodeau has dedicated years of experience in the auditing field to this new edition of Auditing & Assurance Services, supplying the necessary investigative tools for future auditors.

Government Auditing Standards - 2018 Revision United States Government Accountability Office 2019-03-24
Audits provide essential accountability and transparency over government programs. Given the current challenges facing governments and their programs, the oversight provided through auditing is more critical than ever. Government auditing provides the objective analysis and information needed to make the decisions necessary to help create a better future. The professional standards presented in this 2018 revision of Government Auditing Standards (known as the Yellow Book) provide a framework for performing high-quality audit work with competence, integrity, objectivity, and independence to

provide accountability and to help improve government operations and services. These standards, commonly referred to as generally accepted government auditing standards (GAGAS), provide the foundation for government auditors to lead by example in the areas of independence, transparency, accountability, and quality through the audit process. This revision contains major changes from, and supersedes, the 2011 revision.

Essentials of Accounting for Governmental and Not-for-Profit Organizations Paul Copley 2017-01-25 Copley's Essentials of Accounting for Governmental and Not-for-Profit Organizations, 13e is best suited for those professors whose objective is to provide more concise coverage than what is available in larger texts. The main focus of this text is on the preparation of external financial statements which is a challenge for governmental reporting. The approach in this edition is similar to that used in practice. Specifically, day to day events are recorded at the fund level using the basis of accounting for fund financial statements. Governmental activities are recorded using the modified accrual basis. The fund-basis statements are then used as input in the preparation of government-wide statements. The preparation of government-wide statements is presented in an Excel worksheet. NEW for the 13th edition is McGraw-Hill Connect, a digital teaching and learning environment that saves students and instructors time while improving performance over a variety of critical outcomes.

Value-based Management Glen Arnold 2000-06-08

Context and Application Value-Based Management
Edited by Glen Arnold and Matt Davies Over the past ten years hundreds of leading companies worldwide have adopted the principles of value-based management (VBM), an approach to corporate strategy and business organisation in which the primary objective is always shareholder wealth maximisation. As VBM has become more widespread the idea of shareholder value has become integral to business. Consultancies have prospered by selling prescriptions for developing a value-oriented firm and managers thought to be excellent in generating shareholder value are held in high esteem and command huge salaries. This book draws on empirical evidence to demonstrate the success of VBM ideas as well as highlighting many of the hidden questions, doubts and difficulties. It examines the validity of some of the underlying assumptions of VBM and tackles many of the key technical issues. This book provides a timely assessment of the theory and practice of VBM as it grows to maturity.
