Painting Heaven Demi Hunt 2015-09 This illustrated tale introduces children to the wondrous teachings from the Muslim theologian and mystic al-Ghazali (1058–1111CE) This enchanting tale illustrates how that the human heart is like a rusty mirror which, when polished through beautiful doings, is able to reflect the real essence of all things. In addition to this story is a poem by the renowned poet, Coleman Barks. Both draw on the same account found in Ghazali's The Marvels of the Heart, Book XXI, of his magnum opus, The Revival of Religious Sciences.

Modern Art - who Cares? IJsbrand M. C. Hummelen 2005 The conservation of contemporary art should not be a static process carried out behind closed doors but dynamic and open to discourse. New media and new materials constantly present issues which traditional conservation methods cannot address and a continual search for new techniques is therefore required. This dynamic research may include interviews with artists; documentation of artists' materials; the recording of image, word or sound of performances, installations, temporary and 'permanent' visual art; scientific research into the identification, composition,

ageing and preservation of modern materials. This volume makes a most important contribution to the ongoing debate by presenting the conservation challenges relating to ten objects of different media and materials (plastics, kinetic objects, monochromes and works of mixed media) of considerable art-historical value. The ten selected studies include the works of Jean Tinguely, Piero Manzoni, Tony Cragg and Mario Merz. In addition to case studies, this volume includes symposium papers by art historians, physicists, philosophers, artists, conservators and critics on topics as varied as: accidental damage; working with artists; packing and transport; installation; identifying plastics; ethics, training, databases etc.

Experiência neo concreta Ferreira Gullar 2007 In 1959 Ferreira Gullar wrote the Neoconcrete Manifest with the support of artists like Amilcar de Castro, Lygia Pape, Franz Weissmann, Lygia Clark, Theon Spandis and Reynaldo Jardim. Almost 50 years later the Brazilian poet and art-critic gives his testimony for the first time on one of the most radical movements in Brazilian Art in this book. From inside the Neoconcrete movement, Gullar has defined key concepts - such as the "non-object" - and also witnessed the genesis of very important works, like the Contra-relevos made by Hélio Oiticica and the Cocoons by Lygia Clark. The author narrates the formative steps of the so called "Carioca group" of artists, which began when they have broken up with the Concrete artist from Sao Paulo, and writes about his own path as a Neoconcrete poet - the time when he has created the "book-poem" (published for the first time in this book), the "spatial poem" and the daring experiment of the "buried poem". The book also includes an appendix with ten texts written by Gullar since the 50's till recently, three books-poems and the facsimile of the catalogue of the First Neoconcrete Exhibition. The book's design is a reference to the graphic style of that time and the author's own poems.

The Brain Takes Shape Robert L. Martensen 2004-04-08 This fine book tells an important story of how long-standing notions about the body as dominated by spirit-like humors were transformed into scientific descriptions of its solid tissues.

Vesalius, Harvey, Descartes, Willis, and Locke all played roles in this transformation, as the cerebral hemispheres and cranial nerves began to take precedence over the role of spirit, passion, and the heart in human thought and behavior. None of this occurred in a social vacuum, and the book describes the historical context clearly. It also shows how debates over investigative methods and models of body order that first raged over 300 years ago continue to influence biomedicine and the broader culture today. No other book on western mind-body relationships has attempted this.

Doubt and Certainty in Science John Zachary Young 1981 Young's thesis concludes that the higher activities of humans can be illuminated through an

examination of the actual brain functions that produce them, and that these processes can be closely compared to those of a calculating machine.

The Calligraphy of Dreams Juan Marsé 2014-07-31 When Señora Mir lays her body across the abandoned tracks for a tram that will never arrive, she presents Ringo Kid with a riddle he will not unravel until after her death. In Ringo's Barcelona, life endures in the shadow of civil war - the Fascist regime oversees all. Inspired by glimpses of Hollywood glamour, he finds his own form of resistance, escaping into myths of his own making, recast as a heroic cowboy or an intrepid big-game hunter. But when he finds himself inveigled as a go-between into an affair far beyond his juvenile comprehension, he is forced to turn from his interior world and unleash his talent for invention on the lives of others. And all the while he is left to wonder - what could have happened to Señora Mir that day to send her so far beyond the edge of reason? The Calligraphy of Dreams is a luminescent coming-of-age novel with a devilish twist. Reminiscent of Atonement and The Go-between, it is the culmination of the life's work of one of the greatest living Spanish

men of letters.

Blood-Drenched Beard Daniel Galera 2015-01-22 From Brazil's most acclaimed young novelist, the mesmerizing story of how a troubled young man's restorative journey to the seaside becomes a violent struggle with his family's past —So why did they kill him? —I'm getting there. Patience, tchê. I wanted to give you the context. Because it's a good story, isn't it? A young man's father, close to death, reveals to his son the true story of his grandfather's death, or at least the truth as he knows it. The mean old gaucho was murdered by some fellow villagers in Garopaba, a sleepy town on the Atlantic now famous for its surfing and fishing. It was almost an execution, vigilante style. Or so the story goes. It is almost as if his father has given the young man a deathbed challenge. He has no strong ties to home, he is ready for a change, and he loves the seaside and is a great ocean swimmer, so he strikes out for Garopaba, without even being quite sure why. He finds an apartment by the water and builds a simple new life, taking his father's old dog as a companion. He swims in the sea every day, makes a few friends, enters into a relationship, begins to make inquiries. But information doesn't come easily. A rare neurological condition means that he doesn't recognize the faces of people he's met, leading frequently to awkwardness and occasionally to hostility. And the people who know about his grandfather seem fearful, even haunted. Life becomes

complicated in Garopaba until it becomes downright dangerous. Steeped in a very special atmosphere, both languid and tense, and soaked in the sultry allure of south Brazil, Daniel Galera's masterfully spare and powerful prose unfolds a story of discovery that feels almost archetypal—a display of storytelling sorcery that builds with oceanic force and announces one of Brazil's greatest young writers to the English-speaking world. Look for Daniel's new book, *The Shape of Bones*.

Curious? Todd Kashdan 2009-04-21 Dead cats. That's the image many people conjure up when you mention curiosity. An image perpetuated by a dusty old proverb that has long represented the extent of our understanding of the term. This book might not put the proverb to rest, but it will flip it upside down: far from killing anything, curiosity breathes new life into almost everything it touches. In *Curious?* Dr. Todd Kashdan offers a profound new message missing from so many books on happiness: the greatest opportunities for joy, purpose, and personal growth don't, in fact, happen when we're searching for happiness. They happen when we are mindful, when we explore what's novel, and when we live in the moment and embrace uncertainty. Positive events last longer and we can extract more pleasure and meaning from them when we are open to new experiences and relish the unknown. Dr. Kashdan uses science, story, and practical exercises to show you how to become what he calls a curious explorer—a person who's comfortable with

risk and challenge and who functions optimally in an unstable, unpredictable world. Here's a blueprint for building lasting, meaningful relationships, improving health, increasing creativity, and boosting productivity. Aren't you curious to know more?

Women and the Law Anja Louis 2005 Given the remarkable similarities between Burgos's critical analysis and recent feminist legal theory, her writings are still disturbingly relevant today. This study also explores the relationship between melodrama as a genre of manichean worldviews and law as a system of binary oppositions and discusses Burgos's subversion of the former as a means to criticise the latter."--Jacket.

Legend of a Suicide David Vann 2008 "In "Ichthyology," a young boy watches his father spiral from divorce to suicide. The story is told obliquely, often through the boy's observations of his tropical fish, yet also reveals his father's last desperate moves, including quitting dentistry for commercial fishing in the Bering Sea. "Rhoda" goes back to the beginning of the father's second marriage and the boy's fascination with his stepmother, who has one partially closed eye. This eye becomes a metaphor for the adult world the boy can't yet see into, including sexuality and despair, which feel like the key initiating elements of the father's eventual suicide. "A Legend of Good Men" tells the story of the boy's life with his mother after his father's death through the series of men she dates." "In "Sukkwan Island," an extraordinary novella, the father invites the boy homesteading for a year on a remote island in the southeastern Alaskan wilderness. As the situation spins out of control, the son witnesses his father's despair and takes matters into his own hands. In "Ketchikan," the boy is now thirty years old, searching for the origin of ruin. He tracks down Gloria, the woman his father first cheated with, and is left with the sense of "a world held in place, as it turned out, by nothing at all." Set in Fairbanks, where the author's father actually killed himself, "The Higher

Blue" provides an epilogue to the collection."--BOOK JACKET.

The Rise of Athens Anthony Everitt 2016-12-06 A magisterial account of how a tiny city-state in ancient Greece became history's most influential civilization, from the bestselling author of acclaimed biographies of Cicero, Augustus, and Hadrian Filled with tales of adventure and astounding reversals of fortune, The Rise of Athens celebrates the city-state that transformed the world—from the democratic revolution that marked its beginning, through the city's political and cultural golden age, to its decline into the ancient equivalent of a modern-day university town. Anthony Everitt constructs his history with unforgettable portraits of the talented, tricky, ambitious, and unscrupulous Athenians who fueled the city's rise: Themistocles, the brilliant naval strategist who led the Greeks to a decisive victory over their Persian enemies; Pericles, arguably the greatest Athenian statesman of them all; and the wily Alcibiades, who changed his political allegiance several times during the course of the Peloponnesian War—and died in a hail of assassins' arrows. Here also are riveting you-are-there accounts of the milestone battles that defined the Hellenic world: Thermopylae, Marathon, and Salamis among them. An unparalleled storyteller, Everitt combines erudite, thoughtful historical analysis with stirring narrative set pieces that capture the colorful, dramatic, and exciting world of ancient Greece. Although the history of Athens is

less well known than that of other world empires, the city-state's allure would inspire Alexander the Great, the Romans, and even America's own Founding Fathers. It's fair to say that the Athenians made possible the world in which we live today. In this peerless new work, Anthony Everitt breathes vivid life into this most ancient story. Praise for *The Rise of Athens* "[An] invaluable history of a foundational civilization . . . combining impressive scholarship with involving narration."—Booklist "Compelling . . . a comprehensive and entertaining account of one of the most transformative societies in Western history . . . Roman history has an uncanny ability to resonate with contemporary events."—Maclean's "Elegant, swift and faultless as an introduction to his subject."—The Spectator "An engrossing history of a relentlessly pugnacious city's 500-year rise to empire."—Kirkus Reviews "Fascinating history and a great read."—Chicago Sun-Times

Introdução à Organização Burocrática Fernando C. P. Motta 2004 A organização

burocrática, sistema social dominante nas sociedades modernas, é uma estratégia de administração e dominação, fruto e berço da burocracia. Escrever sobre a burocracia é descrever um mundo em que a liberdade se apresenta não como realidade, mas como desejo permanentemente frustrado. Escrever sobre a burocracia é, ao mesmo tempo, denúncia e esperança. Se é preciso entender a burocracia, é preciso também superá-la. 'Introdução à Organização Burocrática' constitui hoje um clássico da teoria administrativa e da sociologia das organizações. É, ao mesmo tempo, um livro didático e crítico. Examina, de forma sistemática, as organizações burocráticas para, de um lado, conceituá-las e entender seu funcionamento, e, de outro, analisá-las como um sistema social de dominação a serviço da própria organização.

Enter brilliant, prickly, overweight astrophysicist, Lena Geduldig. Karl and Lena's connection is immediate. While they work on getting Wayne back, Karl and Lena fall in love -- with time travel, and each other. Unable to resist meddling with the past, Karl and Lena bounce around time. When Lena ultimately prevents her own long-ago rape, she alters the course of her life and threatens her future with Karl. A high-spirited and engaging novel, EVERY ANXIOUS WAVE plays ball with the big questions of where we would go and who we would become if we could rewrite our pasts, as well as how to hold on to love across time.

Making Art Concrete Pia Gottschaller 2017-09-16 In the years after World War II, artists in Argentina and Brazil experimented with geo-metric abstraction and engaged in lively debates about the role of the artwork in society. Some of these artists used novel synthetic materials, creating objects that offered an alternative to established traditions in painting—proposing that these objects become part of everyday, concrete reality. Combining art historical and scientific analysis, experts from the Getty Conservation Institute and Getty Research Institute are collaborating with the Colección Patricia Phelps de Cisneros, a world-renowned

collection of Latin American art, to research the formal strategies and material decisions of these artists working in the concrete and neo-concrete vein. Making Art Concrete presents works by Lygia Clark, Willys de Castro, Judith Lauand, Raúl Lozza, Hélio Oiticica, and Rhod Rothfuss, among others, with spectacular new photography. The photographs, along with information about the now-invisible processes that determine the appearance of these works, are key to interpreting the artists' technical choices as well as the objects themselves. Indeed, this volume sheds further light on the social, political, and cultural underpinnings of the artists' propositions, making a compelling addition to the field of postwar Latin American art.

Inside Installations Tatja Scholte 2011 Anything is possible in installation art—but that freedom comes with a cost, as the mutability of the intended experience along with the typically short lifespan of the techniques and materials used can present great difficulty to the custodian of the work. This important and practical book examines the processes involved in preserving this complex form of art, reinstalling it, and finding ways to re-create the original experience of the work. Edited by the media conservator of the Museum of Modern Art in New York and the program manager at the Cultural Heritage Agency (RCE) in the Netherlands, this book offers a fascinating glimpse at the decisions and processes behind some of the world's most innovative art installations.
