Tao Te Ching Lao Tzu 2015-07-05 Chinese people are known for being philosophical. A person doesn't necessarily have to be religious in order to be philosophical. You just have to learn the best ways to live your life so that you can have a more prosperous future. A classic Chinese manual entitled "Tao Te Ching" teaches people the art of living and the path you must take in order to find fulfillment in your life. This classic Chinese text was written by a sage named Laozi, also known as Lao Tzu. Laozi means "Old Master" in Chinese. Some people like to refer to this classic Chinese text as Laozi instead of Tao Te Ching because they have so much respect for the author. The sage, Laozi, is believed to have lived around 600 B.C. In his professional life, he worked as a record keeper for the Zhou Dynasty Court. However, historians are still unsure about the exact date and time when the Tao Te Ching was actually written. The only thing they know is that the oldest Chinese texts that were excavated dates back to sometime in the late 4th century B.C. Even though they were originally written in the 6th century, the texts that were excavated in the 4th century are likely rewritten texts. The Tao Te Ching is one of the main Chinese classic texts that promote the religious and philosophical principles of Taoism. It is the most fundamental book of text that is studied by all Taoists. It is also a strong influence on other

Chinese schools that teach Confucianism, Legalism and Chinese Buddhism. Chinese painters, poets, gardeners and calligraphers use the philosophies of the book as a source of inspiration. The influence of the Tao Te Ching has spread far throughout Eastern Asia and is one of the most translated books ever written in the history of literature. In Roman culture, the book was transcribed using the Wade-Giles Romanization system. They transcribed the title as "Daodejing." The words "Dao" and "Tao" both mean "the way." The words "De" and "Te" both mean inner strength or virtuosity. And finally, the words "Jing" and "Ching" mean "classic" or "the great book." Therefore, the translation of Tao Te Ching and Daodejing is said to be "The Classic Way to Inner Strength." In other words, if you learn the philosophies in this book then you will have the knowledge of finding the right path to strength and happiness. Tao Te Ching is not a long book to read by any means. It is only 5,000 Chinese characters long with about 81 very brief sections or chapters. The writing is of a classical form of Chinese called zhuanshu. As the centuries went by, the later versions were written in Lishu and Kaishu. As for the chapters, no one knows if the separated chapters were originally placed there by Laozi or if they were added later on. Some people think they were added later on as a way to help memorize the information and add commentary. The whole book is divided into two main parts. The first part is the Tao Ching, which goes from chapter 1 to chapter 37. The second part is the Te Ching, which goes from chapter 38 to chapter 81. Some even refer to this style of writing as laconic and poetic because of its brief chapters and intentional contradictions. This writing is strategic in a sense because it creates memorable phrases and then forces the reader to create their own reconciliations from all the supposed contradictions. This is why it takes some people their entire lives to fully understand the message behind the text. For others, they never fully grasp it.

The Fundamental Elements of Strategy Xiu-bao Yu 2021-03-29 This open access book clarifies confusions of strategy that have existed for nearly 40 years through the core thoughts of three fundamental elements. Unlike the traditional definition of strategy as "a plan to achieve a long-term goal from overall considerations" in a linear view, this book defines strategy from non-linear viewpoint as it is in the real world. The art of a strategy lies not only in the determination of development goals, but also in the identification of development problems and putting forward overall guiding ideology of solving problems. Rich illustrations as well as numerous business and military cases are presented in helping readers to understand the fundamental elements of strategy. The general scope of the book includes introductions to the three fundamental elements of strategy, three-sub decisions of a complete strategic decision, incomplete strategies, relationship between tactic and strategy, three elements of competitive and corporative strategies. There may be biases in company-level, real strategic decision-making which makes a complete strategy not necessarily a perfect one. The book introduces biases and reasons for the biases, helping industrial strategic decision-makers understand the importance of knowing the nature of the company, the industry and its environment. In addition, this book also presents principles and evaluation approaches of strategic decisions, explores the reasons for the excessive definitions of the strategy concept, and discusses directions of future's research tasks. The book will benefit business managers who are interested in knowing what a complete strategic decision is and how to avoid errors or biases in strategic decision-making. It also benefits students in business schools (especially in MBA/EMBA programs) who are (or will be) on executive positions. Academic researchers may find it is interesting to understand strategy from the view of the three elements. The new view provides a novel insight into strategy and promotes several research directions in the future. The three elements of strategy are also applicable to military strategies and readers who are interested in military and may find its value as well.

ECKM2014-Proceedings of the 15th European conference on Knowledge Management Carla Vivas 2014-10-01 The world economy in which we are living poses challenges that lead to a realization that 'more of the same' will be difficult to sustain. This provides an illustration that, in order to create new or modified knowledge practices, strengthen customer relationships and thus positively influence customer satisfaction, organizations must be flexible in configuring (combining) knowledge and knowledge structures in a way that is appropriate for delivering value to the customer. It must simultaneously develop effective strategies for updating the knowledge of its staff members necessary for underpinning the creation and delivery of appropriate knowledge services. Thus, unlearning (forgetting) becomes a critical means for organizational success. The ECKM community of scholars has already initiated dialogue that links its particular strengths to innovation issues. This conference aims to further that dialogue by attracting leading edge work that leverages the ECKM community's in-depth understanding of learning and unlearning to better understand knowledge management. Our aim is to stimulate breakthrough research streams linking learning, unlearning and knowledge management. How can organizations tailor, use, and extend techniques and tools from knowledge management for improving their business practices and processes? Building upon existing work on knowledge management (KM) and organizational learning, the conference will promote interdisciplinary approaches from computer science and information systems, business, management and organization science as well as cognitive science. Emphasis will be put on systematic learning from experience, KM tools and KM success factors. A special interest belongs to knowledge management initiatives which are lightweight (i.e., do not place considerable additional burden on users and KM experts), allow an incremental adoption (i.e., do not require large up-front investment before any return of investment is at least visible), and are flexible regarding frequent changes in experts and topics. Continuing the success of the ECKM conference series since 2000, the 2015 conference will provide an international communication forum bringing together academia and industry for discussing the progress made and addressing the challenges faced by continuous learning in knowledge-intensive organizations.
