Raising America Ann Hulbert 2011-01-26 Since the beginning of the twentieth century, millions of anxious parents have turned to child-rearing manuals for reassurance. Instead, however, they have often found yet more cause for worry. In this rich social history, Ann Hulbert analyzes one hundred years of shifting trends in advice and discovers an ongoing battle between two main approaches: a “child-centered” focus on warmly encouraging development versus a sterner “parent-centered” emphasis on instilling discipline. She examines how pediatrics, psychology, and neuroscience have fueled the debates but failed to offer definitive answers. And she delves into the highly relevant and often turbulent personal lives of the popular advice-givers, from L. Emmett Holt and Arnold Gesell to Bruno Bettelheim and Benjamin Spock to the prominent (and ever conflicting) experts of today.

The Everything Parent's Guide To Children With Juvenile Diabetes Moira McCarthy 2007-04-02 A Simon & Schuster eBook. Simon & Schuster has a great book for every reader.

A Parent's Guide to Raising Grieving Children Phyllis R. Silverman 2009-04-02 When children lose someone they love, they lose part of their very identity. Life, as they knew it, will never be quite the same. The world that once felt dependable and safe may suddenly seem a frightening, uncertain place, where nobody understands what they're feeling. In this deeply sympathetic book, Phyllis R. Silverman and

Madelyn Kelly offer wise guidance on virtually every aspect of childhood loss, from living with someone who's dying to preparing the funeral; from explaining death to a two year old to managing the moods of a grieving teenager; from dealing with people who don't understand to learning how and where to get help from friends, therapists, and bereavement groups; from developing a new sense of self to continuing a relationship with the person who died. Throughout, the authors advocate an open, honest approach, suggesting that our instinctive desire to "protect" children from the reality of death may be more harmful than helpful. "Children want you to acknowledge what is happening, to help them understand it," the authors suggest. "In this way, they learn to trust their own ability to make sense out of what they see." Drawing on groundbreaking research into what bereaved children are really experiencing, and quoting real conversations with parents and children who have walked that road, the book allows readers to see what others have learned from mourning and surviving the death of a loved one. In a culture where grief is so often invisible and misunderstood, the wisdom derived from such first-hand experience is invaluable. Filled with compassion and common sense, *A Parent's Guide to Raising Grieving Children: Rebuilding Your Family after the Loss of a Loved One* offers readers a wealth of solace and sound advice, and even--where one might least expect it--a measure of hope.

Parenting Matters National Academies of Sciences, Engineering, and Medicine 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the familyâ€"which includes all primary caregiversâ€"are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger.

Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Parent Like It Matters Janice Johnson Dias 2022-02 "An accessible blueprint to embolden our daughters to be critical thinkers, fearless

doers, and joyful change agents for our future--from the proud mother of teen activist Marley Dias, founder of #1000BlackGirlBooks. Can we teach our daughters to change the world? Renowned sociologist Janice Johnson Dias is here to show us how. She knows that self-realized girls are created through purposeful parenting. In this book, she asks parents to make conscious choices--from babyhood through adolescence--that will give our girls the resources to take hold of their futures and reach down the ladder to pull up the girls below them so that change becomes a chain reaction. What is our biggest task as parents? To find our joy. Because as parents, we need to live it to inspire it. Just as Dias brings her own jubilant passion to parenting and teaching, she shows us the vital work we must do on ourselves to lay down the burdens of our past to make space for joy and inspire it in our children. Through anecdotes and personal recollections, she shows us how to turn our challenges into adventures, our failures into lessons. She also offers advice based on both cutting-edge research and her own experience, such as: compliment her every day, let her teach you something every week, create daily affirmations, and help her identify heroes and mentors. Dr. Dias understands how easy it is to feel overwhelmed by the enormous work of parenting, but she gives us invaluable tools to raise resilient, optimistic girls who determine for themselves what their world will look like"--

The Parent's Guide to Birdnesting Ann Gold Buscho 2020-09-01 Take coparenting to the next level and provide a stable environment for your children as you and your spouse begin tackling your separation or divorce. For parents who are separating and want to put their children first, birdnesting could be the interim custody solution you've been looking for. Instead of the children splitting their time being shuttled between mom and dad's separate homes, birdnesting allows the children to stay in the "nest" and instead, requires mom and dad to swap, allowing each parent to stay elsewhere when not with the children. Initially popularized by celebrities, this method of coparenting is now becoming more mainstream as a way to help ease children into a new family dynamic. Birdnesting takes work and commitment but with Dr. Ann Gold Buscho's guidance, you'll learn everything you need to know about this revolutionary method. In The Parent's Guide to Birdnesting, you will discover the pros and cons, the financial and interpersonal considerations, and if it's the right decision for you and your family.

Motivate Your Child Scott Turansky 2015-02-03 We need a parenting revolution! Most parenting approaches end up encouraging children to ask the wrong questions about life: What's in it for me? Are you going to pay me for that? What's the minimum I need to do to get by? But God's Word gives us a better way to parent, one that builds strong internal motivation in children. When parents change the way they parent, kids change the way they live. This practical book explores a theology of internal motivation and then gives parents real-life solutions to equip their kids for life. You'll learn . . .

- how to parent in ways that build internal motivation so that kids don't have to rely on you to get things done.
- the four promptings of the conscience and how to coordinate your parenting to take advantage of them.
- ways to energize your spiritual training with fun and creativity.
- how to help children respond to mistakes instead of blaming, defending, or justifying.

The greatest gift you can give your child is strong moral and spiritual development—this book shows you how. Every chapter includes practical examples of families applying the Bible to their current issues. Join the revolution!
