**Complete Loft Conversion Book** Julian Owen 2013-06-30 Loft conversions are one of the most popular types of home alteration and, as this book shows, they can be an enormously useful and stylish addition to a house. If you have not been involved in a building project before, The Complete Loft Conversion Book guides you through the entire process with chapters arranged so that they follow the sequence of events in a real project. Shows how to identify whether your roof space is suitable for conversion and how designers work out ways to make the best use of available space. Using three-dimensional sketches and colour photographs of actual projects, the author illustrates the options for fitting in a staircase and indicates how to estimate the headroom that will be available. Considers the requirements of the local authority planners and building control officers, and provides tips on how to make applications and approvals run smoothly. Presents highly detailed drawings and photographs showing the conversion process. Provides advice on how to avoid cowboy builders and track down the ideal company, how to draw up a fair contract and how to deal with the legal issues that may arise. Supplies checklists and specifications to help monitor progress and ensure that the work is completed to a good standard. A practical, informative book which guides the reader through the entire building project following the sequence of events for a real project. Brimming with useful advice, it contains information not found in other publications. Aimed at all those considering having a loft conversion, those who have made the decision to convert but are still carrying out research and those just about to have work started. Superbly illustrated with 303 colour photographs and highly detailed drawings. Julian Owen MBE is a chartered architect with over twenty years' experience.

**Self Build** Julian Owen 2004 This book, written by an experienced self build architect provides practical, step-by-step advice and guidance on how to build your own high quality, stylish home. Aimed at those who aspire to live in a tailor-made home that expresses their own style because existing houses for sale are either too dull or expensive, but who are daunted by the prospect. It dispels the myth that self-built houses either require you to get your hands dirty or result in little more than brick boxes.

**The Art of TV** Guide Jerry Alten 2007 Jerry Alten started as Art Director of TV Guide in 1967, and for almost 50 years he engaged the world's greatest illustrators to provide the artwork for the pages of the widest circulated magazine in the world. Unlike entertainment magazines today, the digest-sized magazine relied almost solely on illustration, and in many cases, it helped to support the careers of many of the illustrators. Jerry Alten provides a view behind-the-scenes of a magazine that featured some of America's greatest celebrities, the artist who painted them, and the interesting, highly entertaining, and sometimes outrageous interactions between subject, artist, and art director.

**Business Analysis, Requirements, and Project Management** Karl Cox 2021-10-26 IT projects emerge from a business need. In practice, software developers must accomplish two big things before an IT project can begin: find out what you need to do (i.e., analyse business requirements) and plan out how to do it (i.e., project management). The biggest problem in IT projects is delivering the wrong product because IT people do not understand what business people require. This practical textbook teaches computer science students how to manage and deliver IT projects by linking business and IT requirements with project management in an incremental and straightforward approach. Business Analysis, Requirements, and Project Management: A Guide for Computing Students presents an approach to analysis management that scales the business perspective. It takes a business process view of a business proposal as a model and explains how to structure a technical problem into a recognisable pattern with problem frames. It shows how to identify core transactions and model them as use cases to create a requirements table useful to designers and coders. Linked to the analysis are three management tools: the product breakdown structure (PBS), the Gantt chart, and the Kanban board. The PBS is derived in part from the problem frame. The Gantt chart emerges from the PBS and ensures the key requirements are addressed by reference to use cases. The Kanban board is especially useful in Task Driven Development, which the text covers. This textbook consists of two interleaving parts and features a single case study. Part one addresses the business and requirements perspective. The second integrates core project management approaches and explains how both requirements and management are connected. The remainder of the book is appendices, the first of which provides solutions to the exercises presented in each chapter. The second appendix puts together much of the documentation for the case study into one place. The case study presents a real-world business scenario to expose students to professional practice.

**Increasing Student Engagement and Retention Using Mobile Applications** Laura A. Wankel 2013 Mobile technologies are reshaping and reframing the practice of teaching and learning in higher education. This volume critically examines new research on how mobile technologies and m-learning technologies like Skype are being used in higher education to increase learner engagement in an era of increasing globalization and mobility.

New Zealand - Culture Smart! Lyn McNamee 2022-04-14 Don't just see the sights—get to know the people. New Zealand, or Aotearoa (the "Land of the Long, White Cloud") as it is known by the Maori population, is a land of myth and reality, contrast and contradiction, rolling hills and glacial mountains, native bush and gentle farmland. Its people are friendly and welcoming and will often go the extra mile to help you without expecting anything in return. Maori heritage and culture are an integral part of Aotearoa today, and wherever you go, its influence is palpable. As a nation of immigrants, New Zealanders are used to newcomers, yet those who take the time to learn about the country's traditions and the values that people hold dear will be rewarded with a more meaningful and enriching experience of this beautiful land. Culture smart! New Zealand helps you get to the heart of this diverse and multicultural nation. It examines the impact of history, religion, and politics, while tips and vital insights into Kiwi attitudes, customs, and social life will help deepen your experience of this country and its fair-minded people. Have a richer and more meaningful experience abroad through a better understanding of the local culture. Chapters on history, values, attitudes, and traditions will help you to better understand your hosts, while tips on etiquette and communicating will help you to navigate unfamiliar situations and avoid faux pas.

Arella's Repertoire Elayne Zalis 2012-01-25 The novel begins as Arella prepares for 2000 and the fresh start it represents. More at home in cyberspace than anywhere she has actually lived, she reinvents herself and her life story for readers of a multimedia web diary she calls \*Arella's Repertoire, \* a blend of memoir, travelogue, and blog. Characters who star in this virtual drama recapture worlds Arella has known and weave together the memories, dreams, and imaginings that have contributed to her development as a woman and a writer in postmodern America. Framed as an online text that she posts incrementally throughout the month of December 1999, the narrative explores personal and cultural memory. \*Arella's Repertoire\* forms part of a quartet that also includes two works of nonfiction, \*Video-Graphic Alchemy: Transforming "Dear Diary"\* and \*VirtualDayz: Remediated Visions & Digital Memories, \* and another fictional text, \*Vagabond Scribe (Leah's Backstory)\*.

Intellectual Property Law Tanya Aplin 2017-01-05 This book combines extracts from major cases and secondary materials with critical commentary to provide a complete resource for undergraduate and postgraduate students of intellectual property law. All areas of intellectual property law in the UK are covered: copyright, trademarks and passing off, confidential information, industrial designs, patent, procedure and enforcement. This book also tackles topical areas, such as the application of intellectual property law to new technologies and character merchandising. While the focus of the book is on intellectual property law in a domestic context, it provides international, EU and comparative law perspectives on major issues. It also addresses the wider policy implications of legislative and judicial developments in the area.

All about Selfbuild Robert Matthews 2002

Self-build Julian Owen 2021-10-01 If you've ever dreamt of designing and building your own home, this book is for you. Becoming a 'self-builder' doesn't necessarily mean learning to build a house physically from scratch. Anyone can be a self-builder – you can do so without ever having to lay a brick yourself. Self-built homes can also be more individual, better designed and more economical than buying from a developer. This book is designed for homeowners and self-builders, whether aspiring or on the brink of starting a project. It provides a jargon-free, step-by-step guide to the process of designing and building your own home, distilling all of the practical information needed to make your dream house a reality. Carefully crafted to offer friendly, easy-to-understand practical guidance and packed with watch points, hints and tips, it also highlights the potential pitfalls and suggests ways of avoiding them. Including indications of costs and timescales, Self-build demystifies the process of budgeting, finding a site, gaining planning permission, designing your home and all of the surrounding issues to do with sustainability, planning, regulations, procurement and the use of building contracts. Beautifully illustrated with over 230-colour photos, diagrams and plans, it provides all the inspiration and ideas you need to bring your own project to life. Featured houses include: Amphibious House by Baca Architects Corten Courtyard House by Barefoot Architects Haringey Brick House by Satish Jassal Architects Shawm House by Mawson Kerr Architects Sussex House by Wilkinson King Architects The Pocket House by Tikari Works Architects.

Grand Designs Aneta Podkalicka 2018-11-28 This is the first academic book to examine the long running hit series Grand Designs, which occupies a significant place in the popular imagination internationally. The authors apply an empirically grounded, critical perspective to the study of television to reveal how people use the program in their everyday lives. The emphasis on everyday uses and meanings combines creatively with understanding the program theoretically, textually and in terms of its production structures. This position challenges framings of the popular lifestyle and factual television genre that has been dominated by a neoliberal or governmentality perspective for many years. Presented by British designer and writer, Kevin McCloud, Grand Designs follows the progress of home owners as they embark on design, renovation and building projects at almost always dizzying

scales of endeavour. Understanding the program as both a text to analyse and a site of material impact, the book draws on interviews with production members, home renovators, building practitioners and audiences, as well as references to associated media formats to provide contextual depth to the analysis. The authors argue that, as a cultural object, the program is both shaped by and enacts social discourses of home-making, design value and taste. Navigating public, commercial and promotional logics, *Grand Designs* sparks new forms of cultural production and consumer markets.

Low Impact Living Paul Chatterton 2014-08-21 This book is the inspirational story of one project that shows you how you can become involved in building and running your neighbourhood. The author, co-founder of Lilac (Low Impact Living Affordable Community), along with other members of the community and the project team, explains how a group of people got together to build one of the most pioneering ecological, affordable cohousing neighbourhoods in the world. The book is a story of perseverance, vision and passion, demonstrating how ordinary people can build their own affordable, ecological community. The book starts with the clear values that motivated and guided the project's members: sustainability, co-operativism, equality, social justice and self-management. It outlines how they were driven by challenges and concerns over the need to respond to climate change and energy scarcity, the limits of the 'business as usual' model of pro-growth economics, and the need to develop resources so that communities can determine and manage their own land and resources. The author's story is interspersed with vignettes on topics such as decision making, landscaping, finance and design. The book summarises academic debates on the key issues that informed the project, and gives technical data on energy and land issues as well as practical 'how-to' guides on a range of issues such as designing meetings, budget planning and community agreements. *Low Impact Living* provides clear and easy to follow advice for community groups, practitioners, government, business and the development sector and is heavily illustrated with drawings and photographs from the architectural team.

TV Guide Film & Video Companion 2004

Alphabet to Internet Irving Fang 2014-11-13 What Greek philosopher thought writing would harm a student's memory? Was the poet Byron's daughter the first computer programmer? Who plays more video games, women over 18 or teenage boys? In *Alphabet to Internet: Media in Our Lives*, Irving Fang looks at each medium of communication through the centuries, asking not only, "What happened?" but also, "How did society change because of this new communication medium?" and, "How are we different as a result?" Examining the impact of different media on a broad, historical scale—among them mass printing, the telegraph, film, the internet, and advertising—*Alphabet to Internet* takes us from the first scratches of writing and the origins of mail to today's video games, the widespread and daily use of smartphones, and the impact of social media in political uprisings across the globe. A timeline at the end of each chapter places events in perspective and allows students to pinpoint key moments in media history. Now in its third edition, *Alphabet to Internet* presents a lively, thoughtful, and accessible introduction to media history.

Greenlit: Developing Factual TV Ideas from Concept to Pitch Nicola Lees 2010-09-01 "Blows the lid on so many TV secrets" Tom Archer, Controller Factual, BBC "If every first-time producer read this before pitching a program, I guarantee a greater success rate" Gary Lico, President/CEO, CABLEready, USA In recent years there has been an explosion of broadcast and cable channels with a desperate need for original factual/reality programming to fill their schedules: -documentaries, observational series, makeover formats, reality competitions.
