Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to: –Build an accurate threat model for your vehicle –Reverse engineer the CAN bus to fake engine signals –Exploit vulnerabilities in diagnostic and data-logging systems –Hack the ECU and other firmware and embedded systems –Feed exploits through infotainment and vehicle-to-vehicle communication systems –Override factory settings with performance-tuning techniques –Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

Grandfather Knows Best Jerry Zezima 2016-01-04 What guy takes his granddaughter to the aquarium and spouts fish puns all day? Who accompanies her to a children's recreation center and almost faints in the bouncy house? And which grandpa goes to the White House Easter Egg Roll so he can introduce his precious pumpkin not to the president but to Peppa Pig? Jerry Zezima, who also gives grandfatherly advice to Prince Charles, peddles his granddaughter's preschool fundraiser, introduces her to the neighborhood ice cream man, and does lots of other fun stuff, both with and without his adorable princess, which may explain why she is more mature than he is. In "Grandfather Knows Best," nationally syndicated humorist Jerry Zezima writes about the joys of grandparenthood and the things one man will do for the little girl who has captured his heart.

Asia's Next Giant Alice H. Amsden 1989-09-07 South Korea has been quietly growing into a major economic force that is even challenging some Japanese industries. This timely book examines South Korean growth as an example of "late industrialization," a process in which a nation's industries learn from earlier innovator nations, rather than innovate themselves. Discussing state intervention, shop floor management, and big business groups, Amsden explores the reasons for South Korea's phenomenal growth, paying special attention to the principle of reciprocity in which the government imposes strict performance standards on those industries and companies that it aids. She thereby shows how South Korea, Japan, and Taiwan were able to grow faster than other emerging nations such as Brazil, Turkey, India, and Mexico. With its new insights, Asia's Next Giant is essential reading for anyone concerned with global competition and the world economy.

[Trends and Issues in Action Learning Practice](#) Yonjoo Cho 2013-01-04 Dynamic workplaces demand continuous employee learning and development to keep up with current and effective organizational contexts. Action learning is among the most widely used and effective interventions for leadership and organizational development around the world. This timely book provides readers with the first comprehensive account of the history and evolution of action learning in South Korea, informing practitioners and researchers on the best practices of action learning and how they can be modified to fit different cultural contexts. Unlike most literature on action learning, which focuses on implementation strategies in Western contexts, Trends and Issues in Action Learning Practice details a uniquely Korean perspective. South Korean companies engage actively in action learning programs as a tool for leadership and organization development, helping them adapt to global markets and a rapidly changing management environment. Key success factors from twenty years of South Korean action learning, presented through representative case studies and research conducted by both academics and professionals, highlight the importance of culture in action learning and provides readers with insights and advice for future international research and practice.

[Social Reconstructions of the World Automobile Industry](#) Frederic C. Deyo 2016-07-27 This book assesses the varying ways in which automobile assemblers in several countries of East and Southeast Asia, Europe and the Americas have sought to enhance their efficiency and flexibility in response to heightened global competition during the 1980s and early 1990s. It then explores the implications of such managerial strategies for workers and trade unions, and the responses of unions in seeking to preserve or enhance worker welfare and voice under industrial restructuring.

Automotive After Sales Management - A Practical Guide to Successful Workshop Parts & Service Operations Mohamad Idrakisyah 2021-02-23 The after sales segment of the automotive industry is gaining prominence over sales. [Made in Korea](#) Richard M. Steers 2013-08-21 American business folklore is awash with the adventures of successful entrepreneurs. Still, most of these stories are about Americans, neglecting important and courageous entrepreneurs from other countries. Made in Korea recounts the story of how Chung Ju Yung rose from poverty to build one of the world's largest and most successful building empires - Hyundai - through a combination of creative thinking, tenacity, timing, political skills, and a business strategy that few competitors ever understood. Chung entered the shipbuilding business with no experience and went on to create the world's largest shipyard. He began making automobiles when foreign experts unanimously predicted he would fail, and he started a global construction company that has built some of today's greatest architectural wonders. He even convinced the International Olympic Committee to select South Korea over Japan as the site for the highly successful 1988 Olympics. Unlike most CEO's of major firms, Chung has always preferred the company of his workers to that of the global executive elite. Hard work, creativity and a capacity to never give up - this is the essence of Chung's life. In each of his ventures, he exhibited a sheer determination to succeed, regardless of the obstacles, and he worked tirelessly to instill this drive in all of his employees. Even today, in the midst of Korea's worst economic crisis in over four decades, Chung's company is busy implementing plans to emerge as an even stronger contender in the world economy. Illustrated with 32 pages of colour photographs not previously seen in the West, including photos of Chung's recent historic visit to North Korea in 1998, Made in Korea takes stock of Chung's entire life, highlighting both his contributions to society and the lessons his work can teach to aspiring entrepreneurs.

Customers for Life Carl Sewell 2009-07-01 In this completely revised and updated edition of the customer service classic, Carl Sewell enhances his time-tested advice with fresh ideas and new examples and explains how the groundbreaking "Ten Commandments of Customer Service" apply to today's world. Drawing on his incredible success in transforming his Dallas Cadillac dealership into the second largest in America, Carl Sewell revealed the secret of getting customers to return again and again in the original Customers for Life. A lively, down-to-earth narrative, it set the standard for customer service excellence and became a perennial bestseller. Building on that solid foundation, this expanded edition features five completely new chapters, as well as significant additions to the original material, based on the lessons Sewell has learned over the last ten years. Sewell focuses on the expectations and demands of contemporary consumers and employees, showing that businesses can remain committed to quality service in the fast-paced new millennium by sticking to his time-proven approach: Figure out what customers want and make sure they get it. His "Ten Commandants" provide the essential guidelines, including: • Underpromise, overdeliver: Never disappoint your customers by charging them more than they planned. Always beat your estimate or throw in an extra service free of charge. • No complaints? Something's wrong: If you never ask your customers what else they want, how are you going to give it to them? • Measure everything: Telling your employees to do their best won't work if you don't know how they can improve.
