Rome and The Guidebook Tradition Anna Blennow 2019-04-01 To this day, no comprehensive academic study of the development of guidebooks to Rome over time has been performed. This book treats the history of guidebooks to Rome from the Middle Ages up to the early twentieth century. It is based on the results of the interdisciplinary research project Topos and Topography, led by Anna Blennow and Stefano Fogelberg Rota. From the case studies performed within the project, it becomes evident that the guidebook as a phenomenon was formed in Rome during the later Middle Ages and early

Renaissance. The elements and rhetorical strategies of guidebooks over time have shown to be surprisingly uniform, with three important points of development: a turn towards a more user-friendly structure from the seventeenth century and onward; the so-called 'Baedeker effect' in the mid-nineteenth century; and the introduction of a personalized guiding voice in the first half of the twentieth century. Thus, the 'guidebook tradition' is an unusually consistent literary oeuvre, which also forms a warranty for the authority of every new guidebook. In this respect, the guidebook tradition is intimately associated with the city of Rome, with which it shares a constantly renovating yet eternally fixed nature.

He adapts efficiently to an existence in the forest canopy—he hunts, sows crops, plays

games with earth-bound friends, fights forest fires, solves engineering problems, and even manages to have love affairs. From his perch in the trees, Cosimo sees the Age of Enlightenment pass by and a new century dawn.

The Celestial Hunter Roberto Calasso 2020-04-28 A New York Times Book Review Editors' Choice "[Calasso's] flow of associations leaves you feeling not out of your depth, but smarter and better read." --The New York Times Book Review

The eighth part of Roberto Calasso's monumental series on the primal forces of civilization The eighth part of Roberto Calasso's singular work in progress that began in 1983 with *The Ruin of Kasch*, *The Celestial Hunter* is an inspired and provocative exploration of mankind's relationship with myth, the divine, and the idea of transformation. There was a time, even before prehistory, when man was simply a defenseless animal. The gods he worshiped took the form of other beasts or were the patterns of the stars he saw above him each night in the sky, which he transformed into figures and around which he created stories. Soon, however, man learned to imitate the animals that attacked him and he became a hunter. This transformation, Calasso posits, from defenseless victim to hunter was a key moment, the first step on man's ascendance to power. Suddenly the notion of the hunter became fundamental. It would be developed over thousands of years through the figures that became central to Greek mythology, including the constellations. Among them was Orion, the celestial hunter, and his dog, Sirius. Vivid and strikingly original, and expertly translated from the Italian by Richard Dixon, *The Celestial Hunter* traces how man created the divine myths that would become the cornerstones of Western civilization. As Calasso demonstrates, the repercussions of these ideas would echo through history, from Paleolithic to modern times. And they would be the product of one thing: the human mind.

*Savage Kiss* Roberto Saviano 2020-09-08 Roberto Saviano returns to the streets of Naples and the boy bosses who run them in *Savage Kiss*, the hotly anticipated follow-up to *The Piranhas*, the bestselling novel and major motion picture Nicolas Fiorillo and his gang of children—his paranza—control the squares of Forcella after their rapid rise to power. But it isn't easy being at the top. Now that the *Piranhas* have power in the city, Nicolas must undermine the old families of the Camorra and remain united among themselves. Every paranzino has his own vendettas and dreams to pursue—dreams that might go beyond the laws of the gang. A new war may be about to break out in this city of cutthroat bargaining, ruthless betrayal, and brutal revenge. Saviano continues the story of the disillusioned boys of Forcella, the paranzini ready to give and receive kisses that leave a taste of blood. Saviano's *Gomorra* was a

worldwide sensation, and *The Piranhas*, called “raw and shocking” by *The New York Times Book Review*, captured readers with its tale of raw criminal ambition, told with “openhearted rashness” (Elena Ferrante). *Savage Kiss*, which again draws on the skills of translator Antony Shugaar, is the latest thrilling installment from the brilliant Italian novelist.

Computational Power Massimo Durante 2021-03-11 We delegate more and more decisions and tasks to artificial agents, machine-learning mechanisms, and algorithmic procedures or, in other words, to computational systems. Not that we are driven by powerful ambitions of colonizing the Moon, replacing humans with legions of androids, creating sci-fi scenarios à la Matrix or masterminding some sort of Person of Interest-like Machine. No, the current digital revolution based on computational power is chiefly an everyday revolution. It is therefore that much more profound, unnoticed and widespread, for it affects our customary habits and routines and alters the very texture of our day-to-day lives. This opens a precise line of inquiry, which constitutes the basic thesis of the present text: our computational power is exercised by trying to adapt not just the world but also our representation of reality to how computationally based ICTs work. The impact of this technology is such that it does not leave things as they are: it changes the nature of agents, habits, objects and institutions and hence it subverts the existing order, without necessarily generating a new one. I argue that this power is often not distributed in an egalitarian manner but, on the contrary, is likely to result in concentrations of wealth, in dominant positions or in unjust competitive advantages. This opens up a struggle, with respect to which the task of reaffirming the fundamental values, the guiding principles, the priorities and the rules of the game, which can transform, or attempt to transform, a fierce confrontation between enemies in a fair competition between opponents rests on us.

You're an Animal, Viskovitz Alessandro Boffa 2007-12-18 In this wickedly hilarious collection of fables, Alessandro Boffa introduces us to Viskovitz and his never-ending search for his true love, Ljuba. As he changes from a lovelorn lion to a jealous finch, from a confused dung beetle to an enlightened police dog, Viskovitz embraces his metamorphoses with wry humor and an oftentimes painful sense of self. As an ant, Viskovitz fights his way to the top where his egotism calls on the colony to create a monument to his greatness out of a piece of bread. As a sponge, he is horrified by the inbreeding in his family—"I'm my own mother-in-law!!!"—and yearns for a change in current so he can mate with Ljuba, who lies downstream. As a mantis, he asks his mother what his father was like, only to hear, "Crunchy. A bit salty. High in fiber." Unfortunately, when he meets Ljuba shortly thereafter, he follows his father's fate. And as a scorpion, his uncontrollably deadly efficiency meets its

match in Ljuba and finds “no way to escape this intolerable, sinister happiness.”

Social History of Knowledge Peter Burke 2013-06-06 In this book Peter Burke adopts a socio-cultural approach to examine the changes in the organization of knowledge in Europe from the invention of printing to the publication of the French *Encyclopédie*. The book opens with an assessment of different sociologies of knowledge from Mannheim to Foucault and beyond, and goes on to discuss intellectuals as a social group and the social institutions (especially universities and academies) which encouraged or discouraged intellectual innovation. Then, in a series of separate chapters, Burke explores the geography, anthropology, politics and economics of knowledge, focusing on the role of cities, academies, states and markets in the process of gathering, classifying, spreading and sometimes concealing information. The final chapters deal with knowledge from the point of view of the individual reader, listener, viewer or consumer, including the problem of the reliability of knowledge discussed so vigorously in the seventeenth century. One of the most original features of this book is its discussion of knowledges in the plural. It centres on printed knowledge, especially academic knowledge, but it treats the history of the knowledge 'explosion' which followed the invention of printing and the discovery of the world beyond Europe as a process of exchange or negotiation between different knowledges, such as male and female, theoretical and practical, high-status and low-status, and European and non-European. Although written primarily as a contribution to social or socio-cultural history, this book will also be of interest to historians of science, sociologists, anthropologists, geographers and others in another age of information explosion.

The Fear of Barbarians Tzvetan Todorov 2010-10-15 The relationship between Western democracies and Islam, rarely entirely comfortable, has in recent years become increasingly tense. A growing immigrant population and worries about cultural and political assimilation—exacerbated by terrorist attacks in the United States, Europe, and around the world—have provoked reams of commentary from all parts of the political spectrum, a frustrating majority of it hyperbolic or even hysterical. In *The Fear of Barbarians*, the celebrated intellectual Tzvetan Todorov offers a corrective: a reasoned and often highly personal analysis of the problem, rooted in Enlightenment values yet open to the claims of cultural difference. Drawing on history, anthropology, and politics, and bringing to bear examples ranging from the murder of Theo van Gogh to the French ban on headscarves, Todorov argues that the West

must overcome its fear of Islam if it is to avoid betraying the values it claims to protect. True freedom, Todorov explains, requires us to strike a delicate balance between protecting and imposing cultural values, acknowledging the primacy of the law, and yet strenuously protecting minority views that do not interfere with its aims. Adding force to Todorov's arguments is his own experience as a native of communist Bulgaria: his admiration of French civic identity—and Western freedom—is vigorous but non-nativist, an inclusive vision whose very flexibility is its core strength. The record of a penetrating mind grappling with a complicated, multifaceted problem, *The Fear of Barbarians* is a powerful, important book—a call, not to arms, but to thought.

The Late Mattia Pascal Luigi Pirandello 2004-11-30 Mattia Pascal endures a life of drudgery in a provincial town. Then, providentially, he discovers that he has been declared dead. Realizing he has a chance to start over, to do it right this time, he moves to a new city, adopts a new name, and a new course of life—only to find that this new existence is as insufferable as the old one. But when he returns to the world he left behind, it's too late: his job is gone, his wife has remarried. Mattia Pascal's fate is to live on as the ghost of the man he was. An explorer of identity and its mysteries, a connoisseur of black humor, Nobel Prize winner Luigi Pirandello is among the most teasing and profound of modern masters. *The Late Mattia Pascal*, here rendered into English by the outstanding translator William Weaver, offers an irresistible introduction to this great writer's work

Italian taxation of inheritances and trusts Paolo Scarioni 2013-01-18T00:00:00+01:00 The book outlines in the first part the main aspects of Italian inheritance tax legislation and, namely, its territorial scope of application, the issues concerning the taxable estate – such as the valuation of assets, the deductibility of liabilities and the available exemptions – the applicable tax rates and, finally, the essential features of the procedural aspects. The analysis is carried out making a constant reference to the principles stated by the European Court of Justice that, since 2003 with the *Barbier* case, has been dealing with inheritance tax provisions paying attention to their consistency with the fundamental freedoms guaranteed by the EU treaty. In the second part of the book the analysis is shifted to the “state of the art” of the Italian legislation regarding the taxation of trusts, focusing first on the recognition of trusts for income tax purposes and their tax residence and, subsequently, on the tax treatment of the income derived by the trust and of the distributions to the beneficiaries. At last, the application of the inheritance and gift tax is examined.

Market Abuse Regulation Marco Ventoruzzo 2017-11-30 This book analyses the European market abuse regime contained in the Market Abuse Regulation (MAR) and related directives and regulations. Written by leading scholars in the field of capital market law from a number of European jurisdictions, the book is divided into two main parts. The first consists of chapters considering relevant issues by topic; whilst the second provides the first article-by-article commentary on the Regulation, with a detailed and technical analysis of its terms. In the first part guidance is arranged by topic and includes aspects not directly addressed by MAR such as enforcement, and the impact of US securities regulation. As well as considering the sources of market abuse regulation in general, this first part also examines its theoretical and economic framework in order to provide better understanding of the Regulation itself.
