Applied Phlebotomy Dennis J. Ernst 2005 Geared specifically to short courses in blood collection, this concise full-color text teaches the skills necessary to obtain blood specimens effectively and safely, in accordance with Clinical and

Laboratory Standards Institute (formerly NCCLS) and Occupational Safety and Health Administration guidelines. The book presents step-by-step procedure instructions and explains why these procedures are important to blood specimen collections. It Could Happen To You case studies discuss actual phlebotomy-related injuries. Tips From the Trenches offer practical phlebotomy pointers. In the Lab describes what happens to blood in the lab and underscores the importance of key collection concepts. Each chapter ends with multiple-choice review questions.

Expressions of Mercy Helen Gregory 2006 Told against a backdrop of social and political changes as well as modern church developments, this history of the seven internationally renowned Mater Misericordiae hospitals reveals an integral chapter in the medical history of Queensland. From the gestation of the hospitals in the minds of the Sisters of Mercy through the system's rise to eminence in health care—one in six Queenslanders was born at a Mater hospital—this 100-year document will remind millions of patients, nurses, and doctors of the hospitals' touching, high-quality approach.

Requirements for the Retention of Laboratory Records and Diagnostic Material Department of Health and Ageing Staff 2009 "This is the fifth edition of the NPAAC requirements for the retention of laboratory records and diagnostic materials. This edition is substantially the same as the fourth edition, with only minor amendments to the fourth edition. Since the publication of the third edition, there have been significant

developments in Australian laboratory practice. For example, all pathology laboratories are now required to maintain a formal quality system, and must be accredited to ISO 15189 (AS4633). In addition, new privacy principles and legislation have come into effect, legislation has clarified the status of retained human parts and tissues, and the Human Genetics Advisory Commission (HGAC) has been formed. To address these developments, NPAAC has completely revised the requirements for retention, and has adopted guiding principles to create a uniform and integrated approach to retention requirements."--Introduction, p. 1.

Benchmarking in Services Jaideep G. Motwani 2006
Health Services Assistance Kathryn Austin 2017-11-24

Achieve high standards in patient-focused care. Health Services Assistance provides complete coverage of core and elective units for assisting in nursing work in acute care. Exercises throughout the text provide students with the means to self-assess and extend their skills and knowledge. Foundation skills are developed early, underpinning understanding of the specialist acute care chapters that follow. Students are encouraged to reflect and contextualise their learning and to practise techniques in small groups. Activities break up the material so information is easier to retain. Self-check, extension activities and discussion questions can be incorporated into an institution's assessment strategy. Health Services Assistance is structured by competency for HLT33115 Certificate III in Health Services Assistance, supporting nursing in acute care, and is packed with specific cases and examples, as well as including additional content on palliative care and mental health. Each chapter addresses a competency, with a volume of learning that underpins the assessment requirements. The book is structured so that elements and criteria are communicated by the section headings. Teach following the qualification structure, using the print book, eBook or LMS integration.
