Bioinformatics Dev Bukhsh Singh 2021-10-21 Bioinformatics: Methods and Applications provides a thorough and detailed description of principles, methods, and applications of bioinformatics in different areas of life sciences. It presents a compendium of many important topics of current advanced research and basic principles/approaches easily applicable to diverse research settings. The content encompasses topics such as biological databases, sequence analysis, genome assembly, RNA sequence data analysis, drug design, and structural and functional analysis of proteins. In addition, it discusses computational approaches for vaccine design, systems biology and big data analysis, and machine learning in bioinformatics. It is a valuable source for bioinformaticians, computer biologists, and members of biomedical field who needs to learn bioinformatics approaches to apply to their research and lab activities. Covers basic and more advanced developments of bioinformatics with a diverse and interdisciplinary approach to fulfill the needs of readers from different backgrounds Explains in a practical way how to decode complex biological problems using computational approaches and resources Brings case studies, real-world examples and several protocols to guide the readers with a problem-solving approach

Evidence-Based Public Health Ross C. Brownson 2011-01-13 The authors deal not only with finding and using scientific evidence, but also with implementation and evaluation of interventions that generate new evidence on effectiveness. Each chapter covers the basic issues and provides multiple examples to illustrate important concepts.

District Nursing Manual of Clinical Procedures Liz O'Brien 2012-03-09 "This manual, the first of its kind focused on district nursing, provides the means to build competence and confidence in nurses new to the community, or developing their skills. The comprehensive and evidence-based content provides essential information for competence in key areas of district nursing." —From the Foreword, by Rosemary Cook CBE, Hon D Lett, MSc, PG Dip, RGN Director, The Queen's Nursing Institute Clinical skills are a fundamental aspect of district nursing care. The District Nursing Manual of Clinical Procedures is a practical, evidence-based manual of clinical skills which reflects the unique challenges of district nursing care within the patient's home. It provides a comprehensive resource for all district nurses, community nurses, students and healthcare professionals involved in the district nursing team, enabling them to practice competently and confidently and deliver clinically effective, person-centred care. The District Nursing Manual of Clinical Procedures addresses the complexity of district nursing care and encompasses key aspects of clinical practice, including decision making in areas that district and community nurses often struggle with or find difficult when they are on their own in a patient's home. It utilises the latest clinical research and expert clinical knowledge to address these challenges, and to provide the underlying theory and evidence for district nursing care. Key features Evidence-based manual of practical clinical skills in district nursing care Clear, user-friendly and easy to understand Contains recommendations for expert care within a patient's own home Addresses key concerns of district and community nurses working on their own within a patient's home

Encompasses key aspects of district nursing care Placed in the context of person-centred care All procedures include the rationale for each action - 'why' as well as 'how' This title is also available as a mobile App from MedHand Mobile Libraries. Buy it now from iTunes, Google Play or the MedHand Store.

Nissan Silvia and 200sx Sr20det Ca18det T25/T28 Turbocharger Rebuild Guide and Shop Manual Brian Smothers 2014-03-18 What this book is: Turbo Rebuild Guide for the T25 and T28 Journal Bearing Turbocharger Found on the Nissan Silvia (s13, s14, and s15) and 200sx written by an industry professional. Contains teardown, inspection, cleaning guides, re-machining specs, torque specs, and re-assembly guide. Have you seen the turbo rebuild kits for sale online? Have you read some of the do-it-yourself turbo rebuild guides on the internet that tell you to take the turbo apart, replace some parts, and put the turbo back together? Are you wondering if you can rebuild a turbocharger yourself? Don't believe everything you read on the internet-turbocharger repair is a little more complicated than just taking things apart and putting them back together, but with the right guide, you can fix your turbocharger. From the only correct and complete series of turbo rebuild guide books, this step-by-step turbo rebuild guide book tells you how to take your turbocharger apart, how to inspect it, how to fix it, and how to put it back together the right way. Buy this guide before you buy any turbo rebuild kits, parts, or a new turbo-you may be able to save thousands of dollars Covers all T25 and T28 journal bearing turbos: DOES NOT cover any ball bearing units.

The Soar Cognitive Architecture John E. Laird 2012-04-13 The definitive presentation of Soar, one AI's most enduring architectures, offering comprehensive descriptions of fundamental aspects and new components. In development for thirty years, Soar is a general cognitive architecture that integrates knowledge-intensive reasoning, reactive execution, hierarchical reasoning, planning, and learning from experience, with the goal of creating a general computational system that has the same cognitive abilities as humans. In contrast, most AI systems are designed to solve only one type of problem, such as playing chess, searching the Internet, or scheduling aircraft departures. Soar is both a software system for agent development and a theory of what computational structures are necessary to support human-level agents. Over the years, both software system and theory have evolved. This book offers the definitive presentation of Soar from theoretical and practical perspectives, providing comprehensive descriptions of fundamental aspects and new components. The current version of Soar features major extensions, adding reinforcement learning, semantic memory, episodic memory, mental imagery, and an appraisal-based model of emotion. This book describes details of Soar's component memories and processes and offers demonstrations of individual components, components working in combination, and real-world applications. Beyond these functional considerations, the book also proposes requirements for general cognitive architectures and explicitly evaluates how well Soar meets those requirements.

Managing Pain in the Older Adult Michaelene P. Jansen, PhD, RN-C, GNP-BC, NP-C 2008-03-20 Our elderly population is the fastest-growing segment of society, and pain, particularly chronic pain, is one of the most common problems this group faces. In Managing Pain in the Older Adult, Dr. Jansen provides treatment options designed for older adults. Controlling pain can be challenging as the elderly, in addition to the common physiologic changes of aging, often have multiple health problems and take many medications. Furthermore, drugs are only rarely tested on older adults, so pharmaceutical intervention often relies on a slow trial and error regime. Drawing on her experience in critical care and neuroscience nursing as well as work as a GNP, Dr. Jansen adopts a multimodality approach to focus on the assessment, diagnosis, and treatment of acute and chronic pain among older adults with interventional, non-interventional, pharmacotherapeutic, and nonpharmacotherapeutic methods. Managing Pain in the Older Adult addresses a myriad of factors pertaining exclusively to pain management among the elderly, including: The importance of early recognition of pain symptoms Environmental factors that influence pain and its perception Specific issues involved when treating the elderly Non-pharmaceutical treatments: physical therapy, acupuncture, and other complementary techniques Lack of resources for treating pain in the aged The book will serve as an invaluable reference for a wide range of health care providers working with our aging population.
