Eruption in the Canyon Andrew Bennett 2021-09-07 A revelatory, fly-on-the-wall collection of photographs and stories documenting Eddie Van Halen at work in his famed but seldom seen 5150 studio, from the 2004 reunion with Sammy Hagar through the 2007 reunion with David Lee Roth. “When kids ask me how it feels to be a rock star, I say, ‘I’m not a rock star. I’m not in it for the fame, I’m in it because I like to play.’” Eddie Van Halen A fortuitous call from a stranger in the middle of the night led to a once-in-a-lifetime assignment. The stranger was Eddie Van Halen. The assignment, as Eddie related it, was to “capture the truth. Show people how hard I work, because that’s the truth.” Having no idea where this would lead or in what form it might be shared, Andrew Bennett spent portions of the next two years relentlessly

documenting everything that occurred inside Eddie's sanctuary: from rehearsals, recording sessions, and revealing conversations, to vicious arguments, a brotherly brawl, and a wild heist attempt in the middle of the night. Bennett memorialized every square foot of that sacred space, every piece of equipment, and every guitar—including Eddie's beloved Frankenstrat. Featuring more than two hundred photographs, and accompanied by intimate reflections on what the author witnessed, *Eruption in the Canyon* presents an incomparable portrait of one of the most revered artists in history.

Spyworld Mike Frost 1994 "For twenty years Canada has been spying on other nations. Outside public scrutiny or Parliamentary review and frequently acting at the behest of U.S. and U.K. intelligence agencies. Canada has been spying electronically from its embassies in capitals as far-

flung as Moscow, New Delhi, Bucharest, Rabat and Caracas. It has then shared the results with its allies. There is every reason to believe Canada is still doing "embassy collection" today. Techniques developed during the "Cold War" have been honed for political and economic espionage in the nineties." "The agency responsible is the top-secret Communications Security Establishment (CSE) of whose existence most Canadians are unaware. CSE has also used sophisticated equipment, much of it provided by the U.S., to listen in on Canadian and on American citizens, raising vital questions about civil liberties and the invasion of privacy. It has intercepted communications from the Soviet embassy in Ottawa; from British cabinet ministers; from the governments of France and Quebec; from suspected Sikh terrorists in India; and from the Kremlin. Its record is impressive: if it wants to, it can intercept almost any phone, fax or radiowave transmission." "How do we know all this? Because one man, Mike Frost, a communications officer at CSE for nineteen years, has decided that in the post-"Cold War" era it is time for the Canadian public to be told what its government has been doing and for a public debate to ensue." "As he tells the story of his career, he paints a remarkable picture of the Security Establishments of Canada, the U.S. and the U.K. The Americans in particular are revealed as possessing high-tech wizardry that they use for political and economic spying - including, according to Frost, highly controversial spying on the Canadian government. Much of Canada's spying from 1972 to 1990 was undertaken for the Americans. Frost and his immediate boss were at the

centre of the "embassy-collection" scheme, which was code-named "Project Pilgrim". The story of how "Pilgrim" grew by trial and error into a highly successful operation is full of drama, comedy, triumphs and frustrations." "Frost is proud of the achievements, but the questionable aspects of CSE's activities have led him to go public on both CSE's successes and its excesses. While scrupulously careful about not jeopardizing national security or endangering the lives of agents in the field, he nonetheless reveals an institution whose powers are potentially so great that they need to be subject to Parliamentary control and public scrutiny. Spyworld will undoubtedly spur debate and controversy."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

Javatrekker Dean Cycon 2007-10-17 In each cup of

coffee we drink the major issues of the twenty-first century-globalization, immigration, women's rights, pollution, indigenous rights, and self-determination-are played out in villages and remote areas around the world. In *Javatrekker: Dispatches from the World of Fair Trade Coffee*, a unique hybrid of Fair Trade business, adventure travel, and cultural anthropology, author Dean Cycon brings readers face-to-face with the real people who make our morning coffee ritual possible. Second only to oil in terms of its value, the coffee trade is complex with several levels of middlemen removing the 28 million growers in fifty distant countries far from you and your morning cup. And, according to Cycon, 99 percent of the people involved in the coffee economy have never been to a coffee village. They let advertising and images from the major coffee companies create their worldview. Cycon changes that in this compelling book, taking the reader on a tour of ten countries in nine chapters through his passionate eye and unique perspective. Cycon, who is himself an amalgam-equal parts entrepreneur, activist, and mischievous explorer-has traveled extensively throughout the world's tropical coffeelands, and shows readers places and people that few if any outsiders have ever seen. Along the way, readers come to realize the promise and hope offered by sustainable business principles and the products derived from cooperation, fair pricing, and profit sharing. Cycon introduces us to the Mamos of Colombia-holy men who believe they are literally holding the world together-despite the severe effects of climate change caused by us, their "younger brothers." He takes us on a trip through an ancient forest

in Ethiopia where many believe that coffee was first discovered 1,500 years ago by the goatherd Kaldi and his animals. And readers learn of Mexico's infamous Death Train, which transported countless immigrants from Central America northward to the U.S. border, but took a horrifying toll in lost lives and limbs. Rich with stories of people, landscapes, and customs, Javatrekker offers a deep appreciation and understanding of the global trade and culture of coffee. In each cup of coffee we drink the major issues of the twenty-first century-globalization, immigration, women's rights, pollution, indigenous rights, and self-determination-are played out in villages and remote areas around the world. What is Fair Trade Coffee? Coffee prices paid to the farmer are based on the international commodity price for coffee (the "C" price) and the quality premium each farmer negotiates. Fair Trade provides an internationally determined minimum floor price when the C plus premium sinks below \$1.26 per pound for conventional and \$1.41 for organics (that's us!). As important as price, Fair Trade works with small farmers to create democratic cooperatives that insure fair dealing, accountability and transparency in trade transactions. In an industry where the farmer is traditionally ripped off by a host of middlemen, this is tremendously important. Cooperatives are examined by the Fairtrade Labeling Organization (FLO), or the International Fair Trade Association (IFAT), European NGOs, for democratic process and transparency. Those that pass are listed on the FLO Registry or become IFAT members. Cooperatives provide important resources and organization to small farmers in the form of technical

assistance for crop and harvest improvement, efficiencies in processing and shipping, strength in negotiation and an array of needed social services, such as health care and credit. Fair Trade also requires pre-financing of up to sixty percent of the value of the contract, if the farmers ask for it. Several groups, such as Ecologic and Green Development Fund have created funds for pre-finance lending.

Afterburn Zane 2005-01-04 In the latest romantic romp from New York Times bestselling author Zane, two hapless lovers get lost in a dating game gone awry. When Washington, D.C., chiropractor Yardley Brown goes to his local bank, it isn't only to make deposits into his account. He has long since accrued some interest in Rayne Waters, a bank employee who's too beautiful to be true -- and too beautiful to be single. At least that's what Yardley believes, which is why he has never approached her. Little does he know that Rayne is anything but taken. Not for want of trying, of course. But after barely surviving a dating disaster with her hairdresser's brother and then falling for a member of her church band who, it turns out, is celibate, she's on the verge of giving up. That is, until Yardley -- discouraged by his own slew of dead-end romances -- finally works up the courage to give her a try. The true craziness, however, is just beginning, thanks to a cast of characters who seem bent on botching the young couple's relationship. There's Rayne's erratic mother, who constantly boasts about being a "good whore"; Yardley's playboy buddies, always trolling for sex; and, worst of all, past lovers who make a habit of popping up and ruining things as only old flames (or previous mistakes) can. Weaving the carnal and the comical in true Zane fashion, Rayne and Yardley's struggle to find love in a world gone mad is a timeless talk about everything that can go wrong in the dating game -- and a few things that can go right.

Odyssey of an Eavesdropper Martin L. Kaiser, III 2006-10  
Martin Kaiser is a legend within the nation's covert electronic surveillance fraternity. Kaiser built devices that

could bring down a head of state or provide blackmail for a government agency to smear a well-known civil rights leader. In "Odyssey of an Eavesdropper, " he tells his own story -- from an abusive childhood in a Pennsylvania coal-mining town to icon status in the black-ops world of U.S. spy operations as the premier producer of electronic surveillance gadgets and dirty tricks, and then his battle for professional and emotional survival, with the FBI bent on his destruction. Kaiser's clients included the FBI, CIA, DEA, Secret Service, Army, Navy, and Air Force Intelligence as well as intelligence services of Egypt, Argentina, and Canada. However, after his testimony before the National Wiretap Commission in 1975, the FBI embarked on a vendetta against Kaiser, nearly driving him into bankruptcy and resulting in his indictment on charges of illegal wiretapping, conspiracy, and transporting an illegal eavesdropping device across state lines. Acquitted of all charges, and after reinventing himself, Kaiser tells his personal tale while discussing historic moments in U.S. espionage and the future of privacy and surveillance in America.
