Excess Baggage Richa S Mukherjee 2020-12-22 Lately, Anviksha Punjabi can't seem to get anything right. She is in the middle of ending her second marriage, is barely keeping any friends, and repeatedly getting into trouble at work. And as if all that weren't enough, she must put up with her gregarious and over-bearing 67-year-old mother as a housemate. Afraid that if this goes on, she'll finally unravel completely, Anviksha decides that she needs a break - a Bollywood style, solo-trip across Europe kind of break. What she doesn't expect is that her mother, Smita Punjabi, will insist on coming along. The unlikely duo embarks on a journey complete with nudists, an unwelcome blast from the past, a British dog named Bhindi, and several eligible bachelors, and slowly, what was supposed to be a soul-searching journey for one, turns into a life-altering experience for two.

Art on the Edge and Over Linda Weintraub 1996 Recognizing that art at the end of the twentieth century changes too quickly and is too multifaceted and unfamiliar to be automatically understood, Art on the Edge and Over: Searching for Art's Meaning in Contemporary Society explains the intractably avant-garde art of the 1970s, 80s and 90s by searching for art's meaning within the context of popular culture and the common trends that have led to such new forms of expression. This one-of-a-kind resource is composed of 35 easy-to-read, chapter-long essays that each cover a particular deviation from conventional art practices (such as smell as an aesthetic ingredient, shopping as a creative process or blood, pollen, discarded dolls and toxic earth as a medium of expression.) Within each chapter, the theme discussed is illuminated by and elucidates the work of one particular artist (such as Laurie Simmons, Wolfgang Laib, On Kawara, Marina Abramovic, Gilbert and George, David Hammons, Felix Gonzalez-Torres, David Salle, Janine Antoni, Rosemarie Trockel, Andres Serrano, Carolee Schneemann, Barbara Kruger, Vito Acconci, and Mike Kelley). An easy-to-follow guide to the unconventional art of our contemporaries, Art on the Edge and Over is a vital resource for all those interested in art history, studio art, aesthetics, and contemporary society.

Learning with Information Systems Simon Bell 2013-02-01 In Learning with Information Systems the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

Lajja Taslima Nasrin 2014-09-15 A savage indictment of religious extremism and man's inhumanity to man, Lajja was banned in Bangladesh, but became a bestseller in the rest of the world. The Duttas—Sudhamoy and Kironmoyee, and their children, Suranjan and Maya— have lived in Bangladesh all their lives. Despite being members of a small, vulnerable Hindu community, they refuse to leave their country, unlike most of their friends and relatives. Sudhamoy believes with a naive mix of optimism and idealism that his motherland will not let him down. And then, on 6 December 1992, the Babri Masjid is demolished. The world condemns the incident, but its immediate fallout is felt most acutely in Bangladesh, where Muslim mobs begin to seek out and attack Hindus. The nightmare inevitably arrives at the Duttas' doorstep, and their world begins to fall apart.

Violence and Mental Health Jutta Lindert 2015-02-25 Violence is one of the most important challenges, not only for public health systems, but also for public mental health. Violence can have immediate as well as long-term and even transgenerational effects on the mental health of its victims. This book provides a comprehensive and wide-ranging assessment of the mental health legacy left by violence. It addresses the issues as they affect states, communities and families, in other words at macro-, meso- and microlevels, beginning by describing the impact of violence on neurobiology and mental health, as well as the spectrum of syndromes and disorders associated with different forms of violence. The work moves on to tackle violence at the international—and intranational—level before zeroing in on the nature of violence in communities such as villages or city districts. It also examines the results of violence in the family. Each type of violence has distinct effects on mental health and in each chapter specific groups are explored in depth to demonstrate the heterogeneity of violence as well as the diversity of its outcomes in the realm of public mental health. Finally, the book addresses the notion of 'undoing violence' by detailing case studies of effective interventions and prevention occurring in countries, communities and families. These cases give us pause to reflect on the nature of resilience and dignity in the context of violence and mental health. All the chapters have been written by leading authors in the field and provide a state-of-the-art perspective. The authors, from different fields of expertise, facilitate interdisciplinary and international insights into the impact of violence on mental health.

Affective Health and Masculinities in South Africa Hans Reihling 2020-04-24 Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

Advanced Web Services Athman Bouguettaya 2013-08-13 Web services and Service-Oriented Computing (SOC) have become thriving areas of academic research, joint university/industry research projects, and novel IT products on the market. SOC is the computing paradigm that uses Web services as building blocks for the engineering of composite, distributed applications out of the reusable application logic encapsulated by Web services. Web services could be considered the best-known and most standardized technology in use today for distributed computing over the Internet. This book is the second installment of a two-book collection covering the state-of-the-art of both theoretical and practical aspects of Web services and SOC research and deployments. Advanced Web Services specifically focuses on advanced topics of Web services and SOC and covers topics including Web services transactions, security and trust, Web service management, real-world case studies, and novel perspectives and future directions. The editors present foundational topics in the first book of the collection, Web Services Foundations (Springer, 2013). Together, both books comprise approximately 1400 pages and are the result of an enormous community effort that involved more than 100 authors, comprising the world's leading experts in this field.

Curious? Todd Kashdan 2009-04-21 Dead cats. That's the image many people conjure up when you mention curiosity. An image perpetuated by a dusty old proverb that has long represented the extent of our understanding of the term. This book might not put the proverb to rest, but it will flip it upside down: far from killing anything, curiosity breathes new life into almost everything it touches. In Curious? Dr. Todd Kashdan offers a profound new message missing from so many books on happiness: the greatest opportunities for joy, purpose, and personal growth don't, in fact, happen when we're searching for happiness. They happen when we are mindful, when we explore what's novel, and when we live in the moment and embrace uncertainty. Positive events last longer and we can extract more pleasure and meaning from them when we are open to new experiences and relish the unknown. Dr. Kashdan uses science, story, and practical exercises to show you how to become what he calls a curious explorer—a person who's comfortable with risk and challenge and who functions optimally in an unstable, unpredictable world. Here's a blueprint for building lasting, meaningful relationships, improving health, increasing creativity, and boosting productivity. Aren't you curious to know more?

Water for Life 2009 The Water for Life strategy outlines the Government of Alberta's commitments to manage and safeguard Alberta's water resources, now and in the future. The strategy has been the vehicle for managing Alberta's precious water resources since its release in 2003. Because it has been such an effective tool for managing Alberta's water resources, the Government of Alberta renewed the strategy and will implement a renewed action plan. The Water for Life renewal builds upon the good work already undertaken and reaffirms the Government of Alberta's commitment to the Water for Life approach for the wise management of Alberta's water quantity and quality for the benefit of all Albertans. Five years later, Albertans continue to care about the health of the aquatic environment, as well as issues concerning water quality and quantity. They are also aware of the impacts of climate change, unprecedented economic growth and development, and population demands on Alberta's water resources. The renewed Water for Life strategy and action plan reflect current issues in our province and the recommendations made by the Alberta Water Council. It is a renewal that builds on an already strong foundation to ensure continued sustainable water quality and quantity in Alberta. In most cases, significant foundational work has begun or will be initiated in the short-term.

Lifelong Learning Jim Smith 1999 This book provides the first comprehensive picture of lifelong learning and the radical changes needed if it is to become the cultural norm. Clearly written and readily accessible, the book identifies the shifts in attitude and behaviour which are needed to establish a lifelong learning culture. Looking ahead over the next quarter of a century, Jim Smith and Andrea Spurling show how government and learning providers must fundamentally reassess their use of time, space and finance. But, more than that, they also offer a practical, comprehensive and robust strategy for lifelong learning. Through trenchant analysis based on research commissioned by The Lifelong Learning Foundation, this book shows ways of confronting difficult choices and realizing the aim of comprehensive lifelong learning.
